Sutra Plugins

Reusable content blocks

Content Restriction · https://sutraplugins.com/docs/membersutra/content-blocks/

Pro feature: Content blocks need MemberSutra Pro.

Content blocks with where each one is used.

1. Go to **MemberSutra → Content Restriction → Content Blocks** and add a block. Design it with the block editor or Elementor – a pricing table, a sign-up form, a video.
2. Under Restriction Rules choose **Show Alternative Content** and pick the block.
3. Or choose a block for a single post or page in its **Membership Options** panel.

The **Used by** column shows where each block appears, so you can update one block and change the message site-wide.
