Sutra Plugins

Drip content over time

Content Restriction · https://sutraplugins.com/docs/membersutra/content-dripping/

Pro feature: Content dripping needs MemberSutra Pro.

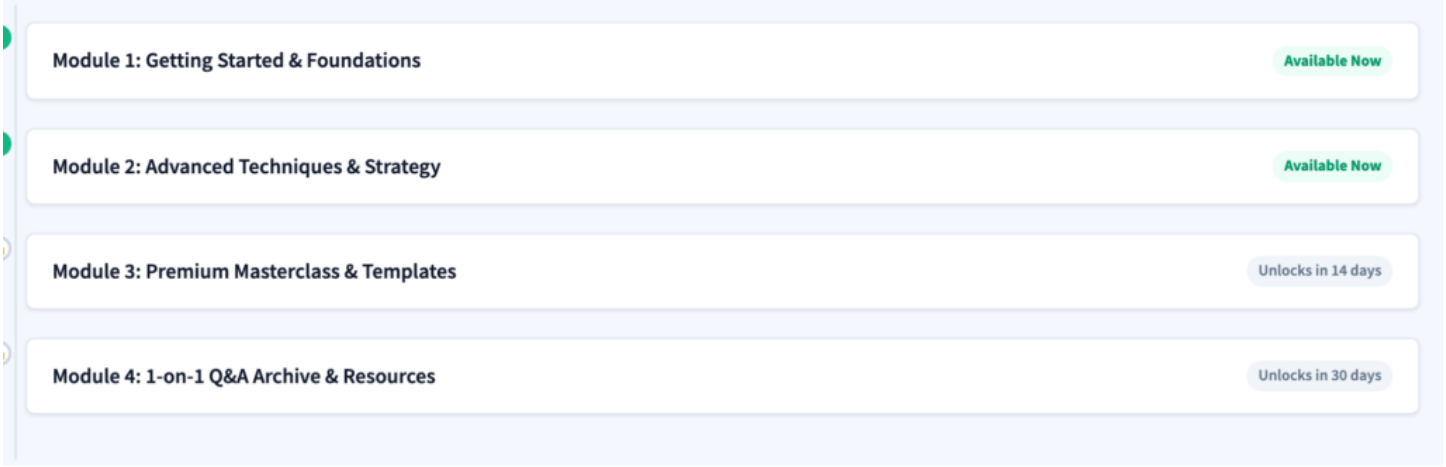

Membership Options on a post: available a number of days after signup, per plan.

1. Edit the page, post or product you want to drip.
2. In the **Membership Options** panel, choose the plans that unlock it.
3. For each plan, set **After N days from signup**.
4. Update the post.

Before the delay passes, the content stays hidden for that member, even if their plan unlocks it.

Members can see what is coming next with the Drip Schedule block.

The Drip Schedule block shows available and upcoming content.

Tip: Drip by plan: a Gold member can get a module on day 0 while a Silver member waits 7 days.
