Sutra Plugins

Create a membership plan

Membership Plans · https://sutraplugins.com/docs/membersutra/create-membership-plan/

1. Go to **MemberSutra → Memberships → Membership Plans** and click **Add New Plan**.
2. Fill in **Plan name**, **Status** (Draft or Active) and an optional **Plan description** shown to members.
3. Choose the **Plan Type** – see Plan types explained.
4. Set **Approval after purchase**: use the store setting, start the membership as soon as the order is paid, or only when you mark the order Completed (manual approval).
5. Link the product that sells the plan, and choose what it unlocks.
6. Click **Save plan**.

The plans list shows type, price, billing, linked product, members and status.

Plan list at a glance

The list shows each plan's **type**, **price**, **duration / billing**, **linked product**, number of **members** and **status**, plus totals such as live memberships and new members this month.

i Good to know: Orders that contain only virtual, downloadable products are completed by WooCommerce automatically, so they are approved automatically even when the plan uses manual approval.
