Sutra Plugins

E-mail branding: logo, colours and sender

E-mails & Notifications · https://sutraplugins.com/docs/membersutra/email-branding/

Go to **MemberSutra → Settings → Email Branding**.

Email Sender Information

- **“From” Display Name** – empty means your site name.
- **“From” Email Address** – use an address on your own domain that your mail service may send for (SPF / DMARC), e.g. noreply@your-domain.
- **Additional Admin Alert Recipients** – extra people who get admin e-mails such as lockouts and new registrations.

Email Template Branding

- **Brand Logo** – a PNG or JPG. Gmail and Outlook do not show SVG images.
- **Header Accent Color** – choose a darker colour so the white site name stays readable.
- **Custom Footer Text & Disclaimer** – support links, store address or legal text.

The **Email Preview** on the same screen shows the real layout with your values, saved or not. Click **Save Changes** when you are happy.
