Sutra Plugins

Members-only products and shop modes

Content Restriction · https://sutraplugins.com/docs/membersutra/members-only-products/

How to manage access to restricted products.

Under **MemberSutra → Content Restriction → Restriction Rules**, **How to manage access to restricted products** offers two modes:

- **Only members can view products** – restricted products are hidden from non-members and cannot be added to the cart.
- **Everybody can view products, but only members can download them** (for free or using credits) – the catalogue stays visible. You choose where the download link shows and can list the files and offer update e-mails – see Download files and update notices.

Pro feature: The “everybody can view” mode and download credits need Pro.

Hide prices from members

Hide price and add to cart buttons for members (**Memberships → Settings**) hides the price and the buy button in your shop for members who already have the product through their plan. Prices always stay visible to you in the WordPress admin.
