Sutra Plugins

Set up PayPal

Payment Gateways · https://sutraplugins.com/docs/membersutra/paypal-setup/

SutraPay for PayPal dashboard.

1. Install and activate **SutraPay for PayPal**.
2. At developer.paypal.com create a **REST API app** and copy its Client ID and Secret.
3. Go to **WooCommerce → SutraPay for PayPal → General**, tick **Enable SutraPay for PayPal** and keep **Sandbox mode** on while testing.
4. Paste the sandbox Client ID and Secret and click **Test connection**.
5. Set the title, description and payment action customers see. Save.
6. Open the **Subscriptions** tab and turn on **Enable subscription renewal billing** – when it is off, PayPal renewals are not charged automatically.
7. Test with a sandbox buyer account, then switch Sandbox mode off and add your live credentials.

Other tabs configure PayPal buttons, Pay Later messages, card fields, wallets and saved payment methods (Vault). Step-by-step guides for each: SutraPay for PayPal docs.

i Good to know: PayPal can only run a subscription whose renewals have one price, or one discount run. Other subscriptions are billed by your site with the customer's saved PayPal account.
