Sutra Plugins

Choose what a plan unlocks

Membership Plans · https://sutraplugins.com/docs/membersutra/plan-content-access/

Pages, posts and products section of the plan editor.

Pages

Pick the **Pages accessible with this plan** and their order with **Page sorting**.

Posts

Choose **All Posts** or **Specific Posts**, then add individual posts, **post categories** and **post tags**. A post in an unlocked category is unlocked automatically, including posts you publish later.

Products

Choose **All Products** or **Specific Products**, and add product categories and tags. Combine this with members-only products to build a members-only shop.

Show what is included

- **Show contents in membership details** lists what the plan includes on the member's Memberships tab.
- **Include contents of other plans** lets a higher tier inherit everything a lower tier unlocks.

Tip: You can see and fine-tune the result per item in the Access Rules table.
