Sutra Plugins

Plan options: downloads, credits and member discounts

Membership Plans · https://sutraplugins.com/docs/membersutra/plan-options/

Linked product, downloads and discount options on a plan.

Users can download

- **All downloadable products without any limit** – members download any downloadable product included in the plan for free.
- **Using credits associated to products to download** – each download uses credits. Set how many credits the plan gives and how often they refill.

Pro feature: Download credits, credit refills and the downloads log need Pro. See Protected downloads and credits.

Give a discount

Turn on **Give a discount** and enter a percentage. Members get that discount on products in your shop. Under **Memberships → Settings**, **For member discounts, apply** decides whether a member keeps the percentage that applied when they joined or always gets the plan’s latest percentage.

Pro feature: Member discounts need Pro. See Member discounts and renewal pricing.
