Sutra Plugins

Pro add-ons: Google Drive, Cart Recovery and Email SMTP

Account & Licensing · https://sutraplugins.com/docs/membersutra/pro-add-ons/

MemberSutra Pro includes three add-ons. They are installed from the Pro screen and work while your Pro licence is active.

Install an add-on

1. Open **MemberSutra → Add-ons** to see what each add-on does.
2. Click **Open on the Pro page**, then install and switch the add-on on there.
3. The add-on gets its own item in the MemberSutra menu (Google Drive, Cart Recovery or Email SMTP) with its settings.

Google Drive Integration

Google Drive for your members: a file browser, gallery, media player and upload box with membership-plan and role permissions, private member folders, WooCommerce downloads and blocks for the block editor and Elementor. It connects through MemberSutra, so no Google credentials are entered in WordPress.

Cart Abandonment Recovery

Finds checkouts that were left unfinished and wins them back: timed reminder e-mails in your store’s e-mail style, optional one-time discount coupons, one-click cart restore links and a recovered-revenue dashboard. Works with the classic and the block checkout.

Email SMTP

Sends every e-mail your site sends (MemberSutra, WooCommerce, WordPress) through a real mail service: any SMTP server or the API of 14 providers (Amazon SES, Brevo, Mailgun, Postmark, SendGrid and more), with a backup connection, routing rules, an e-mail log with open and click tracking, and switches for WordPress’s own notification e-mails.

i Good to know: The Add-ons screen also lists the free SutraPay payment plugins for Stripe, PayPal and Razorpay, which you can install from there.

Next steps

- Install and activate Pro
- E-mails not received
