Sutra Plugins

Renewal synchronization

Subscriptions & Renewals · https://sutraplugins.com/docs/membersutra/renewal-synchronization/

With renewal synchronization, renewals fall on a fixed day – for example the 1st of each month – instead of the day each customer signed up.

1. Turn it on under **MemberSutra → Subscriptions → Settings → Renewal synchronization**, choose which products or categories it covers and what to charge at signup.
2. On the product, set **Synchronize recurring payments on** to a day of the month or the end of the month.

⚠ **Important:** If the first payment at signup is set to none, synchronized products cost $0 in the cart until the first renewal date. Test a checkout after turning this on.
