Sutra Plugins

Requirements and compatibility

Getting Started · https://sutraplugins.com/docs/membersutra/requirements/

Minimum requirements

- **WordPress** 6.4 or newer
- **WooCommerce** 9.0 or newer (tested up to 11.3)
- **PHP** 8.2 or newer
- HTTPS on your site (required by Stripe, PayPal and Razorpay)
- A working WordPress cron, ideally a real server cron job – see How renewals are charged

Works with

- Any well-coded theme, including block themes.
- The block editor and Elementor (Pro adds member blocks and widgets).
- The WooCommerce classic and block-based cart and checkout.
- WooCommerce Subscriptions, if you already use it – see Using WooCommerce Subscriptions.
- Caching plugins: member pages are personalised, so exclude My Account, cart and checkout from page caching (most caching plugins do this automatically for WooCommerce).

Tip: Open **MemberSutra → Tools → System Status** after installing. It checks your server, PHP and WordPress and tells you if anything needs attention.
