Sutra Plugins

Turn a product into a subscription

Subscriptions & Renewals · https://sutraplugins.com/docs/membersutra/subscription-product/

Subscription settings on a WooCommerce product.

1. Edit the product linked to your Subscription / Recurring plan.
2. Under **Product data**, tick **Subscription**. A Subscription Settings section appears.

3. Set the regular price – this is what each renewal costs.
4. Choose the **Billing cycle**: every N days, weeks, months or years.
5. Under **Recurring times**, choose **Until cancelled** or a fixed number of payments.
6. Optionally add a **Signup Fee** and a **Trial Period** – see Free trials and signup fees.
7. Update the product.

Pro feature: Without Pro, billing cycles of 1–7 days or 1–3 weeks are available. Monthly and yearly billing, trials and signup fees need Pro.

Optional limits on this product

- **Limit subscription** – only one running subscription per customer, or only one ever.
- **Override global pausing settings** – how many times and for how long a customer may pause.
- **Override global cancellation settings** – for example, no cancelling in the first 30 days.
- **Synchronize recurring payments on** a fixed day – see Renewal synchronization.
