Sutra Plugins

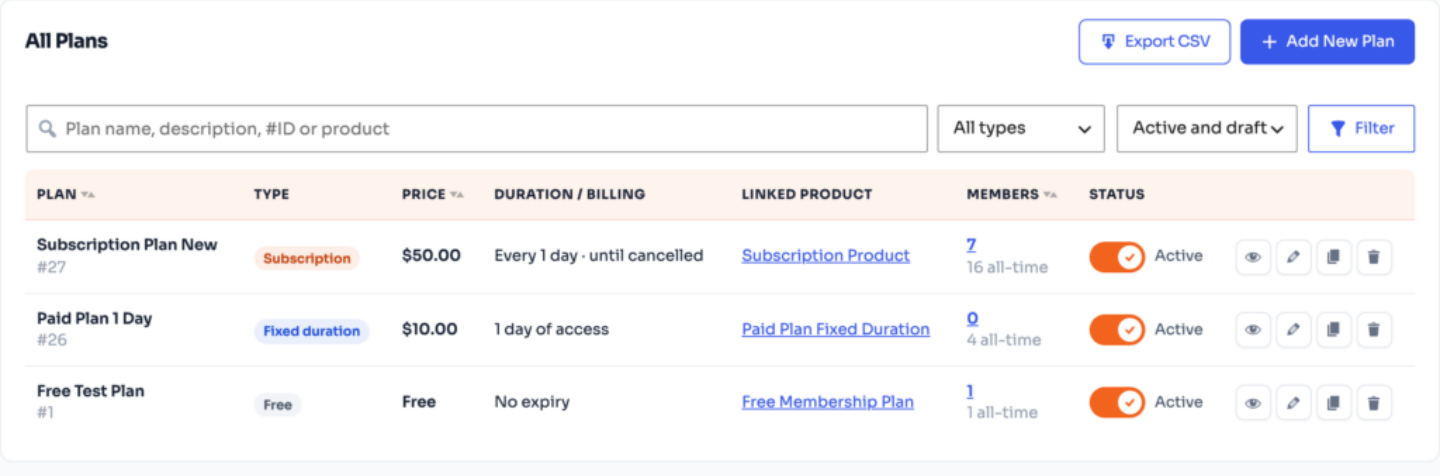

What is MemberSutra?

Getting Started · https://sutraplugins.com/docs/membersutra/what-is-membersutra/

MemberSutra turns your WooCommerce store into a membership site. You create **membership plans**, sell them as normal WooCommerce products, and decide which pages, posts, products and files each plan unlocks. Recurring plans are billed automatically through Stripe, PayPal or Razorpay.

How it works in four steps

1. **Create a plan** – free, lifetime, fixed-length or subscription.
2. **Link a WooCommerce product** – customers buy the product to join the plan.
3. **Choose what the plan unlocks** – pages, posts, categories, products and downloads.
4. **Members get access automatically** – when the order is paid, the membership starts; renewals, reminders and expiry run on their own.

Membership Plans with members, prices and linked products at a glance.

Free and Pro

The free plugin runs a complete membership site: unlimited plans, content restriction, subscriptions with day and week cycles through Stripe, PayPal and Razorpay, the member area in My Account, e-mails and security tools. **MemberSutra Pro** is an add-on that adds monthly and yearly billing, trials

and signup fees, paywalls and content blocks, content dripping, blocks and Elementor widgets, download credits, member discounts, gifts, subscription boxes and advanced analytics.

i Good to know: Pro needs the free plugin. Install both, and Pro switches its features on inside the same screens.

Next steps

- Check the requirements
- Install the plugins
- Quick start: sell your first membership
