Sutra Plugins

Using WooCommerce Subscriptions with MemberSutra

Subscriptions & Renewals · https://sutraplugins.com/docs/membersutra/woocommerce-subscriptions/

MemberSutra has its own subscription engine, so you do not need WooCommerce Subscriptions. If you already use it, MemberSutra recognises its subscriptions: a membership linked to a WooCommerce Subscriptions product starts, renews, pauses and ends together with that subscription.

- Keep the product’s subscription settings in WooCommerce Subscriptions.
- Link the product to a MemberSutra plan as usual.
- Manage billing in **WooCommerce → Subscriptions**; membership access follows automatically.

Tip: Do not make the same product a subscription in both plugins. Use one engine per product.
