Place and style the PayPal buttons

Guides · https://sutraplugins.com/docs/sutrapay-for-paypal/paypal-buttons-placement-style/

The PayPal buttons (PayPal, plus Venmo, Pay Later and PayPal Credit when PayPal offers them to the shopper) can show on the product page, the cart, the mini-cart and above the checkout form.

Choose where they show

1. Open **WooCommerce → SutraPay for PayPal → PayPal buttons**.
2. Under **Placement**, tick Product page, Cart page, Checkout page (express, above the order form) and/or Mini-cart.
3. Click **Save changes**.

Change how they look

- **Layout**: vertical (stacked) or horizontal.
- **Color**: gold, blue or white. **Shape**: rectangle or pill. **Height** in pixels.
- **Label**: "Pay with PayPal", "PayPal Checkout" or "PayPal Buy Now".
- **Funding sources**: tick Venmo, Pay Later or PayPal Credit to hide that button.

A purchase that renews automatically (a subscription) only offers the PayPal button, the card fields and saved methods, because Venmo, Pay Later, Credit and the wallets cannot be saved for renewals.

Product and cart buttons build the order like the checkout does: coupons, fees, shipping and taxes are kept, and the buyer's e-mail and address come from PayPal when none was typed.
