Sutra Plugins

Accept cards with PayPal Card Fields

Guides · https://sutraplugins.com/docs/sutrapay-for-paypal/paypal-card-fields-3d-secure/

Card Fields (PayPal Advanced Credit and Debit Card Payments) add a separate "Credit / Debit Card" option at checkout, where shoppers type their card without leaving your site.

Turn it on

1. In the PayPal developer dashboard, open your REST app and make sure "Advanced Credit and Debit Card Payments" is on.
2. Open **WooCommerce → SutraPay for PayPal → Card Fields** and turn on **Enable card payments gateway**.
3. Set the **Title at checkout** (for example "Credit / Debit Card").
4. Choose **3D Secure**: Always require, When recommended by PayPal, or Never require.
5. Click **Save changes**.

A card payment is only captured when its 3-D Secure result allows it: a failed or unknown authentication is refused and nothing is charged.
