Sutra Plugins

PayPal buttons and Pay Later anywhere: shortcodes and Elementor

Guides · https://sutraplugins.com/docs/sutrapay-for-paypal/paypal-shortcodes-elementor/

Besides the product, cart, mini-cart and checkout placements, you can put the PayPal buttons or a Pay Later message on any page.

Shortcodes

- **[sutrapay_paypal_buttons]**: on a product page, buttons for that product (its add-to-cart form); anywhere else, buttons that pay for the cart.
- **[sutrapay_paypal_buttons product_id="123"]**: buttons that buy one simple product, on any page.
- **[sutrapay_paypal_paylater]**: a Pay Later message for the product's price on a product page, else for the cart total.
- **[sutrapay_paypal_paylater amount="49.99"]**: a Pay Later message for a fixed amount.

Elementor

In Elementor, search for **SutraPay PayPal buttons** or **SutraPay Pay Later message** and drag the widget onto the page. Leave the product ID or amount empty to follow the page, or fill it in. In the editor a placeholder shows where the buttons will appear; they render on the live page.

The PayPal scripts load on any page that uses one of these, and the buttons follow your PayPal buttons and Pay Later settings.
