Sutra Plugins

# Authorize now, capture later

Guides · https://sutraplugins.com/docs/sutrapay-for-razorpay/razorpay-manual-capture/

1. Open **WooCommerce → SutraPay for Razorpay → Settings → Checkout** and turn off **Auto-capture**.
2. One-time payments are then only authorized: the order goes On hold, and the order screen's Razorpay box says "Authorized, not captured".
3. When you are ready, open the order and choose **Order actions → Capture Razorpay payment**.

Capture within a few days: Razorpay refunds an authorized payment that is not captured in time. Subscriptions are not affected by this setting.
