Sutra Plugins

Product page widgets and other plugins

Guides · https://sutraplugins.com/docs/sutrapay-for-razorpay/razorpay-widgets-other-plugins/

Affordability Widget

Razorpay's Affordability Widget shows EMI, cardless EMI, Pay Later and offers under the price on product pages (India, INR). Enable the widget for your account in the Razorpay Dashboard, then tick **Affordability Widget** under **WooCommerce → SutraPay for Razorpay → Settings → Product page widgets**. Choose what it shows (**Offers**, **Card EMI**, **Cardless EMI**, **Pay Later**) and its colour. On variable products it follows the chosen variation's price.

Trusted Business badge

Tick **Trusted Business badge** to show Razorpay's badge on product pages and at checkout. It only appears once Razorpay has given your business the Trusted Business status.

Other plugins

- **WooCommerce Pre-Orders**: pre-orders charged upfront are paid with Razorpay as usual.
- **CheckoutWC**: the Magic Checkout button appears in its express checkout area. **FunnelKit**: in its side cart.
- **WPML**: the title, description and thank-you message can be translated.
- **Checkout plugins** (Germanized, checkout field editors): payments go through WooCommerce's own checkout, so their fields and rules apply.
- **The official Razorpay plugins** can stay active next to SutraPay: each uses its own webhook address and order notes.
