Sutra Plugins

How do I show Klarna or iDEAL as a separate checkout option?

Questions & answers · https://sutraplugins.com/docs/sutrapay-for-stripe/stripe-show-klarna-ideal-separate-checkout-option/

Open WooCommerce > SutraPay for Stripe > Settings > Payment Element, tick the method under "Separate checkout rows", give it a title if you like, and save. The method must also be on in your Stripe Dashboard. The row only shows where Stripe offers the method (currency, country, amount), and methods that cannot be charged again (Klarna, Affirm, ...) are not offered for subscriptions.

More: install and set up SutraPay for Stripe.
